

**易损件 Wearing Parts**

## 产品概述

G型单螺杆泵是一种内啮合的密闭式螺杆泵，属转子式容积泵，由于这种泵对介质的适应性强，流动平稳，吸入性能好，压力脉动小，除可以输送各种可流动的介质外，还可以输送高粘稠介质、含有硬质悬浮颗粒或固体颗粒的介质、含有纤维的介质，调节性能好，范围宽，效率高，因此，在环境保护、船舶、石油、医药、日化、食品、酿造、建筑、采矿、化学、印刷、造纸、电厂、锅炉等各种行业得到广泛应用。G型单螺杆泵零件少、结构紧凑、体积小、维修简便，转子与定子是本泵的易损件，结构简单，便于装拆。

## 工作原理

单螺杆泵是一种内啮合回转式容积泵，主要工作部件是偏心螺杆(转子)和固定的衬套(定子)，由于转、定子的特殊几何形状，分别形成数个单独的密封腔，转子的运转，将各个密封腔内的介质连续地、匀速地、容积不变地从吸入端输送到压出端。由于有这些特性，单螺杆泵特别适合下列工况的工作：

1. 输送高粘度的介质；
2. 输送含有固体颗粒或纤维的介质；
3. 要求连续、压力稳定、不出现周期性压力波动；
4. 要求搅动小、不破坏被输送介质的固有结构；
5. 低的噪声。

## Product Overview

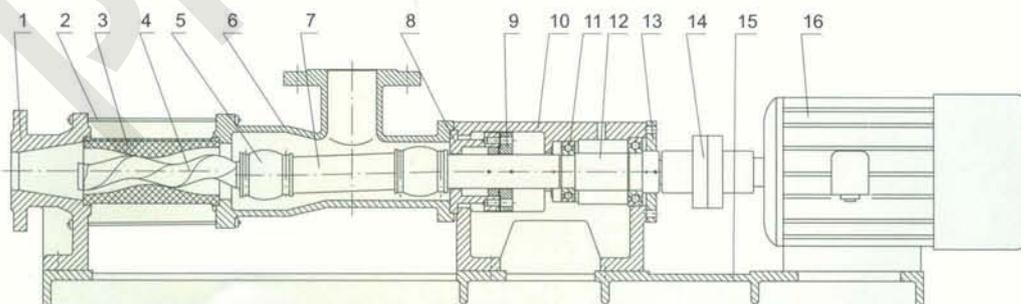

G Single Screw Pumps is an enclosed screw pump with inner gearing, a kind of rotor positive-displacement pump. As this kind of pump is characterized by being adaptable for the medium, stable flow, good suction performance and small pressure pulsation, it can transfer very viscous media or those containing hard suspended or solid grains or fiber apart from various flowing media. Besides, it boasts good adjusting performance, wide range and high efficiency. Therefore, it is widely applied in various industries like environmental protection, shipping, petroleum, pharmacy, household chemical, food, brewage, construction, mining, chemistry, printing, paper making, power plants and boilers. The pump fewer parts, compact structure, small size, maintenance is simple, the rotor and the stator is the pump wearing parts, simple structure, easy assembly and disassembly.

## Working Principle

The single screw pump is a kind of rotary positive-displacement pump with inner gearing. Its main working parts include eccentric screw (rotor) and fixed bush (stator). Due to special geometric shapes of the rotor and the stator, several separate seal cavities come into being respectively. The rotation of the rotor drives the transfer of media in all seal cavities from the suction end to the extrusion end continuously at a constant speed with the same volume. By right of these characteristics, the single screw pump is especially suitable for the following working conditions:

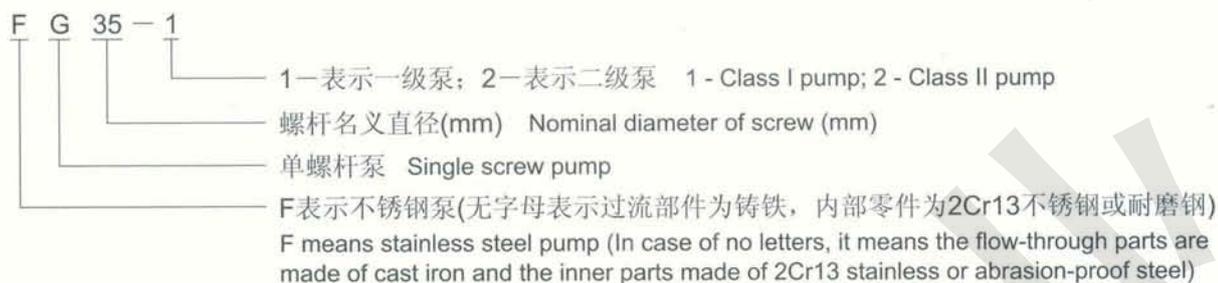

1. Transfer of very viscous media;
2. Transfer of media containing solid grains or fiber;
3. Requiring continuous operation, stable pressure and no regular pressure fluctuation;
4. Requiring small agitation and no damages to the inherent structure of transferred media;
5. Low noise.

## 型号意义 Model Explanation

## 应用范围 Application Scope

单螺杆泵作为一种通用泵，流量可以根据要求，通过改变速度进行调节，运行速度可高可低，出口压力可随泵的级数增加而增加，每增加一级，压力增加0.6MPa，在以下范围和行业广泛应用：

1. 环境保护：工业污水、生活污水、含有固体颗粒及短纤维的污泥浊水的输送，特别适用于油水分离器、板框压滤机等设备；
2. 船舶工业：轮底清洗、油水、油渣、油污水等介质的输送；
3. 石油工业：输送原油、原油与水的混合物、煤田气和水的混合物、往地层内灌注聚合物等等，从而降低了机械采油、采煤田气的成本，增加了油口采收率；
4. 医药、日化：各种粘稠浆、乳化液、各种软膏化妆品的输送；
5. 食品罐头工业：各种粘稠淀粉、食油、蜂蜜、糖浆、果浆、奶油、鱼糜肉糜以及其下脚料的输送；
6. 酿造工业：各种发酵粘稠浆液、浓酒糟、粮食制品渣、各种酱类、浆类和含有块状固态物的粘液等；
7. 建筑行业：水泥砂浆、石灰浆、涂料及其它糊状体的喷涂与输送；
8. 采矿工业：矿井内的含固体颗粒的地下水和污浆水排送到地面；
9. 化学工业：各种悬浮液、油脂、各种胶体浆、各种粘合剂；
10. 印刷、造纸工业：高粘度油墨、墙纸的PVC高分子塑料糊和各种浓度的纸浆、短纤维浆料的输送；
11. 工业锅炉、电厂：水煤浆的输送。

As a kind of universal pump, the flow of the single-screw pump can be adjusted by changing the running speed and its outlet pressure can increase along with the rise of pump stage with 0.6Mpa up per stage. It is widely applied in the following scope and industries:

1. Environmental protection: transfer of industrial and domestic sewage and sludge and turbid water containing solid grains and short fiber, esp. Applicable for oil-water separator, plate-and-frame filter press, etc.;
2. Shipping industry: washing of tanker bottom and transfer of such media as oily water, oil residue, and oily sewage;
3. Petroleum industry: transfer of crude oil, mixture of crude oil and water as well as mixture of coal field gas and water, and pouring polymer into the stratum, thus reducing costs of mechanical extraction of oil and coal field gas and increase the recovery ratio of oil field;
4. Pharmacy and household chemical: transfer of various viscous slurry, emulsion and cream cosmetics;
5. Food and can industry: transfer of various viscous amyllum, edible oil, honey, syrup, juice, cream, scrappy fish and meat and leftover bits and pieces;
6. Brewage industry: transfer of various fermented viscous slurry, thick lees, residue of food products, soy sauce products, serum products, slime containing solid blocks, etc.;
7. Construction industry: spray and transfer of grout, lime mortar, dope and other paste materials;
8. Mining industry: draining ground water and sewage containing solid grains in mines up to the ground;
9. Chemical industry: various suspensions, grease, glue slurry and adhesives;
10. Printing and paper making industry: transfer of very viscous printing ink, PVC macromolecule plastic paste of wallpaper, paper pulp with various concentrations and serum materials containing short fibers;
11. Industrial boiler and power plant: transfer of coal water slurry.

## 选型原则 Model Selection Instructions

### 1. 根据介质粘度选择泵的转速 The Rotary Speed of Pump Should be Based on the Viscosity of Medium

介质粘度 Medium Viscosity (cst)	1~1000	1000~10000	10000~100000	100000~1000000
转速 Speed (r/min)	400~1000	200~400	<200	<100

### 2. 根据介质的磨损性选择泵的转速 The Rotary Speed of Pump Should be Based on the Abrasion Property of Medium

介质磨损状况 Abrasion of medium	介质名称 Names of medium	转速 Speed (r/min)
无磨损 Nil	淡水、促凝剂、油、浆汁、肥皂水、血液、甘油等 Fresh water, coagulant, oil, paste, soap water, blood and glycedn etc.	400~1000
一般磨损 Average	工业废水、油漆颜料、粘灰浆、鱼、麦麸、菜籽油过滤后的沉积物等 Sediment of filtered industrial wastewater, paint pigment, mortar, fish, wheat bran and colza oil etc.	200~400
严重磨损 Serious	泥浆、石灰浆、灰泥、陶土、粘土等 Sludge, lime mortar, clay mortar, china clay and clunch etc.	50~200

注：a. 表中给出了所输送的具体介质及其磨损性的特例，请注意介质的特性随其浓度和温度的变化而变化。

b. 当泵的规格越大时，转速应选低一些。

Note: a. In the table is a sample of specific medium delivered and its abrasion property. Note that the characteristics of medium vary according to the change of concentration and temperature.

b. The greater the specifications of pump, the lower the rotary speed.

### 3. 按输出压力定级数 The Number of Stages Depends on Output Pressure

磨损性 Abrasion	一级 1 Stage	二级 2 Stage	磨损性 Abrasion	一级 1 Stage	二级 2 Stage	磨损性 Abrasion	一级 1 Stage	二级 2 Stage
无 Nil	0.6MPa	1.2MPa	一般 Average	0.4MPa	0.8MPa	严重 Serious	0.2MPa	0.4MPa

注：在选择转速时也要根据经验，因为一些其它因素也影响着转速的选择，在最后确定了上述数值的同时最好与本公司协商而定。

Note: The selection of rotary speed should be based on experience, as some other factors may have influence on the selection of rotary speed. After being sure of the above numerical value, you'd better consult with our company for final decision.

### 4. 单螺杆泵用的橡胶基本特性 Basic Characteristics of Rubber Used in Single Screw Pump

橡胶特性 Rubber Characteristic	丁腈橡胶 NBR	氟橡胶 FPM	乙丙橡胶 EPDM	天然橡胶 NR	食品橡胶 W-NBR
耐最高温度 Maximum temperature	+100℃	+150℃	+120℃	+60℃	+180℃
耐磨性 Wear resistance	○	○	●	○	○
耐老化性 Aging resistance	●	○	○	×	○
耐臭氧 Ozone resistance	×	○	○	×	×
耐蒸汽 Steam resistance	●	○	○	×	●
耐燃性 Flame resistance	●	○	○	×	○

注 Note : ● 很好 Very Good ○ 优 Excellent × 不行 No

## 5. 单螺杆泵根据介质选择定子橡胶 Stator Rubber is Chosen for Single Screw Pump According to Medium
